Tariff reform is still our purpose. Though we oppose the theory that tariff laws may be passed baving for their object the granting or discriminating unit unfair governments and to private ventures, we wage no exterminating war against any American interests. We believe a readjustment can be accomplished in accordance with the principles we profess without disaster or demolition. We believe that the advantages of treer raw material should be accorded to built manufacturers, and we contemplate a fair and caseful distribution of necessary tariff burdens rather than the precipitation of our motives and purposes, instigated by a selfishness which seeks to hold in unrelenting grasp its unfair advantage under present tariff laws. We will rely upon the intelligence of our fellow-counter men to reject the charge that a party comprising a majority of our people is planning the destruction or injury of American interests; Tariff Reform Is Not Free Trade.

and we know they cannot be frightened by the spectre of impossible free trade.

Opposed to the Force Bill.

The administration and management of our Government depend upon popular will. Federal power's the instrument of that will—not its master. Therefore the attempt of the opponents of Democracy to interfere with and control the suffrage of the States through Federal agencies develops a design, which no explanation can miligate, to reverse the proposed and their Government. Such as attempt cannot fall to be regarded by thoughtin reckless disregard of a free expression of the popular will. To resist such a scheme is an impulse of Democracy. At all times and in all places we trust the people. As against a disposition to force the way to Federal power, we present to them as our claim to their cannot fall to the master chambions by of their rights.
